

Mounting frame IP20 McShine

SAFETY INSTRUCTIONS: Check the appliance for damage before commissioning. If this is the case, please do not operate the appliance. If you have any questions, defects, mechanical damage or other problems, please contact the dealer or manufacturer. If you have any doubts about the safety of the product or if it is not working properly, have it checked by a qualified electrician and repaired if necessary. Please note that technical modifications to the appliance will immediately invalidate the appliance's licence! Keep the operating instructions for the appliance in a safe place. **Installation, electrical work and repairs may only be carried out by qualified electricians. Risk of electric shock and accident!** When working on 230 V, please ensure strict compliance with the accident prevention regulations. Do not short-circuit the connections and circuits. Do not kink, crush, pinch or otherwise damage the cables. Due to the heat generated by the light, the spotlight must not be covered or touched on the housing during operation. Please do not look directly into the light source to prevent eye injury. Do not drop the appliance. It could be damaged if it hits a hard surface. Avoid installation in locations with large temperature differences. Electrical components must not come into contact with moisture. Only wipe the device with a soft, dry cloth. Never use scouring powder or chemical cleaning agents. Do not leave the packaging material lying around carelessly; plastic film/bags, polystyrene parts, etc., could become dangerous toys for children. The device does not belong in the hands of children, it is not a children's toy! The bulb in this light is not replaceable. As soon as the bulb has reached the end of its service life, the entire light must be replaced. Only use lamps/lamps approved by the manufacturer. The maximum lamp wattage must not be exceeded. Keep a sufficient distance (0.5 m) from easily flammable objects (e.g. curtains, drapes, etc.) and flammable materials! Flammable materials! Ignition temperature $\lt; 250^{\circ}\text{C}$. Components of the light and especially the lamps/light sources can become hot during operation. Especially with halogen or high-performance LED light sources. Pay attention to cables and gas and water pipes when drilling. Always lay the cable so that it does not touch the luminaire.

Intended use: This product is for lighting purposes only and may only be installed with downward light distribution. Use only in dry indoor areas.

INSTALLATION: The circuit fuse must be switched off! Ensure that there is no voltage using a suitable measuring device! Saw a suitable hole in the ceiling based on the installation diameter, e.g. using a hole saw. Insert the appropriate light source into the frame. Connect the light source to the socket or power cable provided. Insert the installation frame including light source into the existing hole.

DISPOSAL INSTRUCTIONS: By separating, recycling and disposing of old appliances in this way, you are making an important contribution to protecting our environment. Packaging can be disposed of free of charge in accordance with local regulations at the appropriate collection centres. According to the European WEEE Directive, electrical and electronic appliances may not be disposed of with household waste. Their components must be recycled or disposed of separately, as toxic and hazardous components can cause lasting damage to health and the environment if disposed of improperly. As a consumer, you are obliged under the German Electrical and Electronic Equipment Act (ElektroG) to return electrical and electronic equipment free of charge at the end of its life to the manufacturer, the point of sale or to public collection centres set up for this purpose. Details are regulated by the respective state law. The wheeled bin symbol on the product, operating instructions and/or packaging indicates these regulations.
