

Instruction Manual

LED transformer McShine, electronic, 0,5-12W, 230V to 12V, Ø55x23mm, round

Dear customer,

Congratulations on the purchase of your McShine LED transformer.

With this choice you have decided on a product which combines appealing design and technical features.

Please read the following connecting and operating instructions carefully and follow them in order to get the longest possible and safe use of your product.

Please read the operating instructions carefully before using the device.

We hope you enjoy using your new product!

Performance Features

The ideal transformer for your LED spotlights. The round ballast from McShine fits behind any light switch. Mount it with its open cable ends into standard cavity wall sockets. Supply voltage and current can be precisely matched to your LED spotlights.

Installation

Connect the input voltage to brown (L - outer conductor/phase) and blue (N - neutral conductor).
Connect the output voltage red (+) and black (-) to the corresponding poles of the LED lamp.

Safety instructions

- Keep the operating instructions of the device
- Check the device regularly for damage
- Do not modify the product or accessories
- The product is not suitable for outdoor use
- Do not short-circuit the connections and the circuits
- Use the product only if it is in perfect condition. Do not put a defective device into operation!
- Check the device for damage before putting it into operation. If this is the case, please do not put the device into operation!
- Keep the device away from moisture and humidity.
- Avoid extreme loads such as extreme heat or cold, wetness, microwaves, mechanical pressure and vibrations.
- In case of questions, defects, mechanical damage, and other problems, please contact the dealer or manufacturer.
- Repair and maintenance work on the device may only be carried out by trained personnel!
- Lay the cable in such a way that nobody is hindered or endangered by it.
- The product is not a toy and does not belong in children's hands!
- Do not leave the packaging material lying around carelessly, plastic foils / bags, polystyrene parts, etc., could become a dangerous toy for children.
- Installation only by a qualified electrician.

Disposal instructions

According to the European WEEE Directive, electrical and electronic devices must not be disposed of with household waste. Their components must be recycled or disposed of separately, because toxic and hazardous components can cause lasting damage to health and the environment if disposed of improperly. As a consumer, you are obliged under the Electrical and Electronic Equipment Act (ElektroG) to return electrical and electronic equipment free of charge at the end of its service life to the manufacturer, the point of sale or to public collection points set up for this purpose. Details are regulated by the respective state law. The symbol on the product, the operating instructions and/or the packaging indicates these regulations. By separating, recycling and disposing of old equipment in this way, you are making an important contribution to protecting our environment.

Packaging can be disposed of free of charge at the appropriate collection points - paper in the paper garbage can, plastics in the yellow bag and glass in the used glass container.

Technical details:

- Overvoltage and short circuit protection
- easy connection (bare cable)
- working range 0,5-12W
- input 220-240V~
- output constant voltage 12V=
- ØxH: 55x23mm
- not dimmable
