LED-Driver McShine

0.5–30W, 110–240 V AC, 12 V DC (constant voltage), round

TECHNICAL DETAILS: · IP20 - Indoor use · Surge and short-circuit protection · Easy connection (bare wire) · Power range: 0.5–30 W · Input: 110–240 V AC · Output: 12 V DC · Diameter x Height: 55 x 23 mm · Not dimmable

SAFETY INSTRUCTIONS: The product must not be modified technically or mechanically, as this will immediately void the operating license and conformity. The type plate or any labeling must not be removed under any circumstances. Before each use, the product should be checked for possible damage. If any damage is visible, the product must be inspected, repaired, or replaced by a qualified professional. A damaged or defective product must never be used and must be disposed of in accordance with applicable regulations. Please ensure that all packaging materials and accessories, especially small parts such as screws or plastic films, are kept out of reach of children and animals, as they pose a risk of suffocation. The manufacturer accepts no liability for material damage or personal injury caused by improper use, misuse, failure to follow the instructions, or modifications to the product. Ensure that the product is never operated, placed, or stored within reach of children or animals. Please keep these instructions in a safe place and pass them on together with the packaging when transferring the product to another user. We reserve the right to make changes to the product, packaging, or instructions.

SAFETY INSTRUCTIONS LED-Diver:

For indoor use in dry locations only (IP20). Installation and connection must only be carried out by a qualified electrician and with the power supply disconnected. Switch off the mains supply before installation and secure it against being switched on again. Operate only with the specified input voltage and do not exceed the permitted output load. Ensure adequate ventilation and do not cover the LED driver or operate it near heat sources. Protect from moisture, water, dust and mechanical damage. Do not use if damaged or malfunctioning. Do not open or modify the product. Install out of reach of children.

ASSEMBLY

Connect the blue (N) input cable to the neutral conductor and the brown (L) input cable to the live conductor of the power supply; then connect the red (+) and black (–) output cables to the poles of the LED lamp.

DISPOSAL INSTRUCTIONS: By separating, recycling and disposing of old appliances in this way, you are making an important contribution to protecting our environment. Packaging can be disposed of free of charge in accordance with local regulations at the appropriate collection centres. According to the European WEEE Directive, electrical and electronic appliances may not be disposed of with household waste. Their components must be recycled or disposed of separately, as toxic and hazardous components can cause lasting damage to health and the environment if disposed of improperly. As a consumer, you are obliged under the German Electrical and Electronic Equipment Act (ElektroG) to return electrical and electronic equipment free of charge at the end of its life to the manufacturer, the point of sale or to public collection centres set up for this purpose. Details are regulated by the respective state law. The wheeled bin symbol on the product, operating instructions and/or packaging indicates these regulations.
